

Example SOP FOR WHITE WASHING

- **WHITE WASH TECHNIQUE**

Add 6 cups of Hydrated (slaked) lime to 1 gallon of warm water

Add 2 cups table salt to prevent solution from freezing up to -9c or 4 cups table salt to prevent from freezing to -18c

Mix well with cordless drill and mixer attachment

Pour mixture into sprayer or submerge sump pump directly into bucket

- **BARN 1**

Remove all equipment including feedlines, waterlines, brooders, fill auger system (pvc pipe) and transfer to Barn 2

- **BARN 2**

Begin with White washing all equipment from Barn 1 ensuring that all surfaces and surrounding areas are covered in solution

Spot white wash ceiling/walls/posts where visible dust or organic material is present

Spot white wash any areas with torn foil insulation ensuring surrounding areas are covered thoroughly

- **BARN 3**

Spot white wash ceiling/walls/posts where visible dust or organic material is present

Spot white wash any areas with torn foil insulation ensuring surrounding areas are covered thoroughly
